

FIRST Tech Challenge 2015 – 2016 Kit of Part Options

Starting in 2015, teams can order their robot supplies in the TMS registration system in what is called the “FTC Storefront”. This will combine their registration payment and kit of parts fees together, requiring only one bill and automatically deducting any awarded grants from the final total. In the FTC Storefront, teams will have several options of what to buy. **If you do not see a grant that you were expecting, please DO NOT checkout.** Please check again in a few days.

FTC has created resources to assist Mentors in ordering your robot supplies through TMS:
