## Core Device Discovery

The Core Device Discovery application for Modern Robotics Inc. Core System allows you to view module information, test, and run most aspects of each module from your PC. Compatible modules include the Core Motor, Servo, Device Interface, and Legacy. It is recommended that the Core Power Distribution module be used in line with any connected controllers however controllers may be connected directly to your computer as well. To get started, view the user guide below and download the application.

[Open User Guide](#)

647KB PDF File, Last Updated 10/27/2015

[Download Windows Application 1.2](#)

7.13MB Zip Folder, Last Updated 11/6/2015. Fixes error with Windows 8 and 10.

[Download Mac Application 1.0 \\*\\*](#)

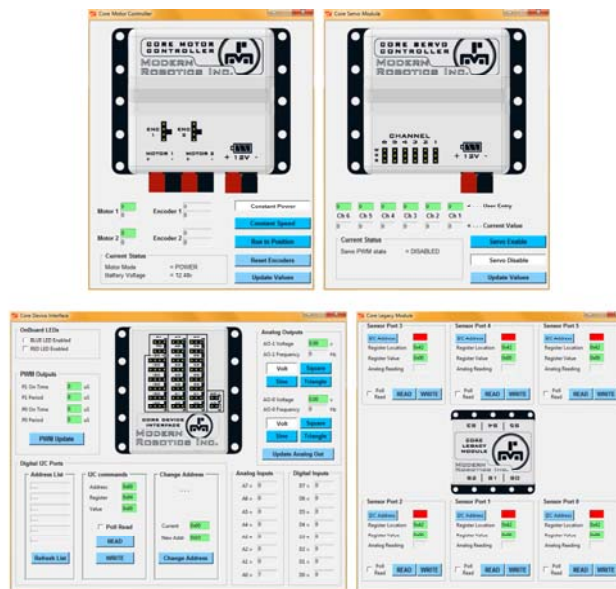

7.86MB Zip Folder, Last Updated 11/24/2015.

\*\*Due to security restrictions, Core Device Discovery for Mac must be manually cleared past the Gatekeeper. To do this go to System Preferences -> Security & Privacy -> General and allow CDD access to your computer. This action will only need to be taken once.

For assistance, call Modern Robotics support 786-393-6886 or email [support@modernroboticsinc.com](mailto:support@modernroboticsinc.com).

A few customer have reported not having the device drivers installed on their PC. Without the device driers, the computer will not recogize the modules. To fix this, go to <http://www.ftdichip.com/Drivers/VCP.htm> and select the "setup executable" in the comments column. Installing this driver will allow the modules to talk to the computer.
